Technical data sheet

ADLER
Paint runs through our veins.

Aqua-Tint 9009

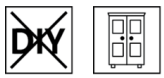
Water-based pigment concentrates for **industry** and **trade**

PRODUCT DESCRIPTION

General

Water-based dyestufff concentrates with good lightfastness and a high degree of luminosity.

Application area



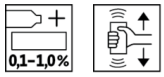
For staining water-based lacquers for furniture and interior finishing:

when coating natural surfaces with the aim of retaining the structure of the wood and achieving a look that is similar to grain-enhancing solvent-based clear varnishes (e.g. Aduro Tiropur (2548)).

if the selected colour tone of stained surfaces is to be deepened or slightly changed in colour.

PROCESSING

Processing instructions



- Please shake the product before use.
- If clear coats are to be coloured, this is usually only carried out on the top coat.
- For problem-free application of coloured paints, the colour contrast with the substrate must not be too strong.
- If natural surfaces or only very light-coloured stained substrates are to be painted, an additional quantity of 0.1-1.0% by weight to the topcoat will be sufficient.
- For dark woods or dark stained surfaces, the amount added can be increased to 5 % by weight.
- Please observe the respective technical data sheets of the blended products.
- We recommend Aqua-Tint UV (9008) for colouring UV-curing water-based paints.
- Before starting to apply the paint, always test the coating on the original substrate in order that you can assess the selected colour in terms of both ease of use and the results achieved. Bei guter Farbabstimmung mit dem zu lackierenden Untergrund kann in Ausnahmefällen mit dem angefärbten Lack sowohl grundiert als auch decklackiert werden.
- Any change in the processing sequence, environmental conditions, non-observance of instructions or the use of products not listed may have an unfavourable effect on the result.

Our instructions are based on the current state of knowledge and are intended to advise the buyer/user to the best of our knowledge, but must be individually adapted to the areas of application and processing conditions. The buyer/user is responsible for deciding on the suitability and use of the supplied product, which is why we recommend that a sample be produced to check the suitability of the product. In all other respects, our General Terms and Conditions of Sale apply. All previous data sheets lose their validity with this edition. We reserve the right to make changes to container sizes, color shades and available gloss levels.
